
Indications for Transport Partner - Transports with hanging garment -

1. The drivers must be trained in textile shipments.
2. Before start, the drivers have to check, if there are enough bars for hanging garments in the loading space. This means:

XL-swap bodies:	30 bars
XXL-swap bodies:	45 bars
Trailer:	80 bars

If there are not enough bars for hanging garments, the dispatch department of Meyer & Meyer must be informed immediately.

3. After loading, the transport unit must be locked compulsory with a seal by the carrier. The seal number must be noted on the accompanying documents by the drivers. The seals are provided from the customer. Alternatively, Meyer & Meyer can provide seals.
4. For transports with hanging garment at Meyer & Meyer only trailer with box bodies and bars are allowed.

The swap bodies and trailers must be equipped with a side wall with keyhole plates with a space of 60/80 mm so that bars for hanging garments can be used.

Before use, the vehicles must be checked by Meyer & Meyer.

5. The loading space must be odourless and clean.
6. The loading security with functional bars for hanging garments (incl. wraps and Velcros) must be possible.
