

Information for Transport Partner

- steel boxes for trailer documents -

To be able to show the original trailer papers at police controls or at the borders, especially for trailers that are shipped unaccompanied, the units are equipped with steel boxes at the front wall. Like this, we improve quality and transit time for these traffics.

For each lowliner-tractor, which is permanently inserted on the relation Germany - Genoa / Livorno - Germany, you will receive one **master key** for the steel boxes. The handover will be documented. Please report a loss of a master key to the Transportpartnermanagement as soon as possible. Lost keys will be charged with € 500,00 per key. If a vehicle fades out from fixed operation, the key must be returned immediately.

Your driver has to record the existence of the original trailer papers. This has to be done by taking a picture of the papers in the steel box and by marking it on the trailer protocols at every hand-over and take-over, especially in the harbours. In the event of a loss of the papers, relieve yourself by having the paperwork logged at all times, otherwise we will charge € 200,00 for the administration costs.
