

Flyer of information for transport partners
 - Dieselflex Version 3 EU-Algeciras -

- 1. Aim**
 - > protect against volatility of the fuel prices = compensate fluctuations
 - > transparency and confirmability
- 2. Source**
 - > Homepage of the ADAC (Allgemeiner Deutscher Automobil-Club e.V.):
 weekly download of the average fuel prices of the relevant transit countries
<https://www.adac.de/infotestrat/tanken-kraftstoffe-und-antrieb/kraftstoffpreise/tanken-im-ausland/>
- 3. Principles**
 - > at the end of the month, the **monthly average fuel price** is drawn
 - > the monthly average fuel price is then compared to the **diesel price socle**
 - > the diesel price socle has its average in the fuel prices of December 2014 and January 2015
 - > per 5 Euro-Cent deviation of the monthly average fuel price from the diesel price socle, the reimbursement is adjusted by **1% up or down**
 - > the Dieselflex is determined until max. the second week of the following month
 - > applies from the date of discovery to the date of discovery in the following month
