

## Information for transport partners

### - Coverage of the CMR-insurance of Meyer & Meyer -

For every transport partner with head office outside of Germany that does not have the CMR-insurance at a German assurance company, Meyer & Meyer negotiates for transports in his behalf a **CMR-third-party-insurance**. This is necessary for a solid coverage for you and us due to the high amount of transported goods. Without this coverage, we are not able to execute our transports - and therefore your and our employment.

The CMR-third-party-insurance covers the following services:

- ✓ Payment of the premiums and handling of damages are done by Meyer & Meyer
- ✓ No regress to you as transport partner
- ✓ No deterrent fee and cheap conditions for the insurance
- ✓ Automatized settlement of the premiums with your credit notes

The insurance coverage is only valid if transport partner and driver take care that

- only faultless and suitable transport equipment is used;
- the goods are always properly secured with a security lock;
- loaded trucks are not parked on unguarded parking areas;
- after every break, the locking systems are controlled

In case of damages we need directly concrete information about the accident. If damages occur due to gross fault of the driver or your dispatch department, we are forced to hold you liable for any costs arising.

The insurance will be deducted as a percentage of the effective freight charge for each credit note payment. Please refer to your condition agreement for the exact rate.
