
Guide for transport partners - Trailer take-over and handover control -

Each time Meyer & Meyer trailers are taken or handed over, a status log of the trailers must be created and sent via the "RepTool" app. If protocols are not filled or not completely filled and send to us, according to this guide, and you cannot be relieved, we are forced to hold you liable for all damages.

Send the file **directly after taking / handing over** the trailer.

Please fit out your drivers accordingly with devices for recording and sending the protocols and photos via the "RepTool" app.

We are instructed of your assistance and the attention of the drivers. The sending of the protocols does not replace the necessary timely information to our disposition in case of problems, damages and disagreements in the transport process.

Below you will find a brief instruction.

You will receive the access data in a separate e-mail.
