

Meyer & Meyer is recommending Frotcom to help improve transport business efficiency

Meyer & Meyer and Frotcom are working together to establish unified fleet tracking across the supply chain, resulting in improved efficiency and competitiveness.

How Frotcom will help

Frotcom offers a high-quality, reliable fleet management system that allows you to monitor your fleet in a simple and effective way; resulting in a proven increase in productivity, margins and customer service.

It also provides Meyer & Meyer visibility of your vehicles that are currently working for them. This is done by a simple yes/no authorization, by you, for each vehicle. In the future you will also receive transport orders directly from Meyer & Meyer through the Frotcom system enabling tasks to be tracked throughout the complete supply chain.

Special conditions for our Transport Partners only

Track and Trace version	9.99 €
Truck version	14.95 €
Premium version	19.95 €

Benefits for you

Closer integration in to the Meyer & Meyer supply chain

Information will flow faster and more efficiently between your company and Meyer & Meyer, resulting in a more efficient supply chain and improved competitiveness.

Reduced costs & Improved efficiency

Lower fuel and maintenance costs, through effective fleet management, remote engine monitoring and job dispatch & planning.

Frotcom is currently present in more than 30 countries worldwide through a network of local Frotcom Certified Partners. Frotcom is used by thousands of companies worldwide for fleet management and GPS vehicle tracking. The solution has been adopted by both small, and large fleets of over one thousand vehicles.
