

# RepTool

For creating and sending a trailer protocol

# Guide for transport partners

## - Trailer take-over and handover control -

Each time Meyer & Meyer trailers are taken over and handed over, a status log of the trailers **must be created** and sent via the "RepTool" app. If protocols are not or not sufficiently filled out and sent according to this guide and you cannot be relieved, we are forced to hold you liable for all damages.

Send the file **directly after receiving / handing** over the trailer.

Please equip your drivers accordingly with devices for recording and sending the protocols and photos via APP.

We are dependent here on your assistance and the attention of the drivers. The sending of the protocols does not replace the necessary timely information to our disposition in case of problems, damages and inconsistencies in the transport process.

Below you will find brief instructions.

You will receive the access data in a separate e-mail.
